Alexandria, VA 22313-1450

Sir:

The following is submitted in the above application in compliance with 37 CFR 1.97 and 37 CFR 1.98: a concise explanation of the non-English document(s) cited in the PTO-1449 and any Search Report or communication from a non-US patent office or an International Search Report from an International Searching Authority for a patent application filed via the Patent Cooperation Treaty or document (s) cited in the application or the priority application. The concise explanation is based on an English language abstract available from publicly accessible databases of patents and non-patent documents or a translation, even if only partial, of the cited non-English documents. The concise explanation is not based on a review of a full text translation of the cited document:

Document

Concise Explanation

FR 2 717 619

An X-ray tube with a rotating anode on a shaft. A first end of the shaft is screwed on a structure. A second end is mounted on the structure with an elastic ring. The ring does not have a diabolo shape.

DE 90 17 291

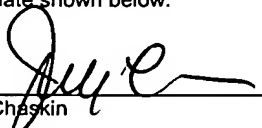

A radiography tube with a rotating anode which is secured on a shaft in a housing. Each end of the shaft is mounted in the housing with antifriction bearings. No disclosure of a ring having a diabolo shape.

FR 2 518 805

A method to increase X-ray tube emission. A rotating Anode is mounted on a shaft. The anode could be mounted in ball bearings which comprise rings with a particular form. No disclosure of a ring having a diabolo shape.
